EXPERIENCE

2025 (Sep–Present)

self employed

Web Developer

- Built and deployed a scalable web platform from scratch using a Java and modern frontend libraries.
- Designed a microservices architecture with Spring Boot to handle complex data routing efficiently.
- Implement secure user authentication and authorization using JWT and strict role-based access controls.
- Built responsive, dynamic user interfaces utilizing modern frontend frameworks like Next.js for an optimized user experience.

2025 (Feb–Aug)

Global CSR | Remote Internship

Web Developer

- Developed and managed multiple international web platforms.
- Built responsive front-end layouts and customized UI components to align with brand guidelines.
- Administered the web ecosystem, including core platform updates, system backups, and security monitoring.

PROGRAMMING LANGUAGES & FRAMEWORKS

Java	★★★★★
Springboot	★★★★☆
JPA&JDBC	★★★★☆
SQL&JPQL	★★★★☆
JavaScript	★★★★★
TypeScript	★★★★☆
React&Next.js	★★★★☆
Git&GitHub	★★★★☆
Docker	★★★★★
Kubernetes	★★★☆☆

EDUCATION

2021– 2025| Marwadi University

Bachelor In Computer Engineering

Rajkot, Gujarat, India

SKILLS

- Communication
- Teamwork
- Training and Development
- Scrum
- Debugging
- Problem Solving
- Sustainability

LANGUAGES

- Arabic (Native)
- English (Fluent)
- German (Basic)

CERTIFICATES

- Go Java With E-Commerce
- Java Spring Boot Full Stack Masterclass
- Cybersecurity Essentials
- Python Data Structure
- Internship
- Cisco Network Essentials

INTERESTS

- UN and global topics (CSR, SDGs, NGOs,environment, education and youth)
- Technology & Innovation: Digital transformation, AI-driven automation, and aviation technology.
- Adventure Sports: Outdoor activities, paragliding.

PROJECTS

• Multi-Vendor Platform

A multi-vendor e-commerce platform optimized for high transaction volumes and Strick user role workflows.

Industry: E-Commerce

Techstack: Java Spring Boot, Next.js, Microservices, Eureka, Kafka, Redis, API Gateway, MapStruct (Under Development)

Tasks:

- Built the entire backend from scratch using Java Spring Boot to achieve a scalable microservices architecture.
- Secured platform with JWT authentication and managed custom workflows for 4 distinct user roles
- Used Java Records and MapStruct for fast, clean, and type-safe data mapping (DTOs).
- Set up the API Gateway with rate limiting and circuit breakers to keep the system stable during traffic spikes.
- Added product caching with Redis to speed up catalog load times and reduce database load.
- Connected microservices using Eureka for service discovery and Kafka for reliable background event streaming.
- Build Next.js frontend, using TypeScript and Zustand for simple state management.
- I used Server-Side Rendering (SSR) for product pages (better SEO) and Client-Side Rendering (CSR) for interactive user dashboards.

• E-Commerce (Branding)

Built complete direct-to-consumer (D2C) Yerba Mate brand , managing both the technical side and the visual brand identity and product design.

Industry: D2C E-Commerce

Techstack: Java Spring Boot, React.js, Redux, REST APIs, MySQL Adobe Photoshop & Illustrator

Link: (www.matessa.in)

Tasks:

- Built and secured a monolithic backend using Java Spring Boot to manage the product catalogue, user authentication, and order processing.
- Built interactive frontend using React.js, implementing Redux to manage the global state .
- Designed the complete visual identity for the brand , including the core logo and responsive website UI layouts.
- Structured the database and frontend components to handle unique product variations and custom flavor profiles.
- Created print-ready physical packaging designs, specifically custom stand-up zip pouches for various product flavors.

• Global CSR & International Sustainability

Built a network of connected web platforms (Global CSR, Arab CSR, Spain CSR) that serve as centralized international hubs for Corporate Social Responsibility .

Industry: Corporate Social Responsibility

Techstack: WordPress, Custom CMS Development

Links: (www.globalcsr.org, www.spaincsr.org, www.qatarcsr.org)

Tasks:

- Customized WordPress themes so each site has its own identity and design.
- Managed and configured WordPress plugins to add new site features
- Created mobile-friendly media galleries to display images and articles clearly on both phones and PC
- Configured technical SEO settings to improve search engine rankings and overall site visibility.
